

Vibration Hour Meter

Vibration hour meters RZ provide exact times of operation in hours and minutes and can be used for any form of mobile or stationary vehicle or device/equipment.

Suitable for most activity fields, for on- and off-road vehicles, especially when they are out on hire, the RZ Meters guarantee the necessary cost transparency, security and information for economical decisions.

Simple to install – no wires, no cable. The RZ meters use shocks and vibrations to collect the operation times.

R Z 5 2 - 6 0

Important data at a glance

Type		RZ 52	RZ 52-60	RZ 52D
RZ 52 h horizontal mounting	05.29.0001.1			
RZ 52 v vertical mounting	05.29.0002.1			
RZ 60 h horizontal mounting	05.29.0003.1			
RZ 60 v vertical mounting	05.29.0004.1			
RZ 52 Dh horizontal mounting absorber ring	05.29.0005.1			
RZ 52 Dv vertical mounting absorber ring	05.29.0006.1			

Technical information		
measurements (H x W x D)	RZ 52/ 60/ 52D	ø 58 x 75/65 x 75/80 x 75 mm
panel cut outs		ø 52/60/71 mm
mounting depth		67,5/69/59 mm
weight		145 g/185 g (RZ-D)
ambient temperature		-15°C bis +60°C
protection quality		IP 65, front panel dust and water proof
moving force		vibration and energy transformer
accuracy		± 3 % at uninterrupted operation
counting range		99 999h
mounting/ installation		wall mounting
mounting position		RZ 52 h horizontal to 45° RZ 52 v vertical to 45°
